

# Network, Security & IT Solutions

In today's world, firewalls are a necessity not a luxury. We ask them to intercept and manage millions of bytes of data every second of every minute of every day. They must instantly decipher between good, revenue driving data and non-productive, possibly malicious damaging bytes right now. Firewalls vary in quality and must be constantly reviewed, updated and managed securely to ensure availability throughout its lifecycle.

## **Firewall Monitoring and Management—Managing real-time change, flexibility, risk-mitigation and secure availability**

In small and emerging medium business IT environments, the internal team is asked to do everything; from fixing PCs to creating new passwords to managing network security. It's resource intensive to expect an overburdened staff to manage ever-changing firewall policies, updates and lifecycle maintenance, too.

Enterprise environments are managing clusters of firewalls or mega-appliances with disparate connectivity and compliance requirements set across time-zones, international regulations and thousands of end users.

Security Inspection, Inc. ensures the following:

- Protection against vulnerabilities and network threats 24 x 7 x 365.
- Monitoring for always-on, optimum firewall performance.
- 99.999% always-on, always-available secure firewall performance.
- Compliance performance within all industries – PCI, GLBA, ISO 27001, FISMA and HIPAA.
- Portal visibility and real-time views along with instant contact and failover if performance alters.
- Perimeter visibility, security and updated performance.

Security Inspection, Inc.,  
*ensuring your network security.*

- **Firewall Monitoring and Management:** Managing real-time change, flexibility, risk-mitigation and secure availability.
- **Cloud Security:** Managing to exact security standards ensuring your mission-critical data and information, while you leverage benefits
- **Security Consulting & Vulnerability Assessment Service:** Helping you keep critical information secure, compliant and connected.

Security Inspection, Inc. can provide the following key monitoring and management attributes:

**Firewall consulting, recommendations and performance enhancements.**

Security Inspection, Inc. can assess your present day firewall configuration, ensure best-in-class lifecycle performance and make recommendations on future firewall purchases or managed firewall provisioning by Security Inspection, Inc.

**Management and monitoring of new VPN users, new hires and exiting employees, new partner and customer protocols and added-subtracted enterprise applications.**

Security Inspection, Inc. can help you administer and manage existing firewall policy or help you design and develop security protocols applicable to your firewalls. Security Inspection, Inc. can take on the intensive tasks while assuring there are no breaches that infect your network, your firewall and all of the aligned-connected appliances it ensures.

**Firewall activity management 24 x 7 x 365, expertise that extends across your enterprise.** We can handle site assessments, firewall policy design and implementations, log monitoring, activity portals, full-on firewall management and monitoring with comprehensive reporting, failovers, emergency response and disaster recovery.

---

**About Security Inspection, Inc.**

Network security is no longer a luxury, it is a necessity. Ensuring your company is secure from network attacks is a top priority for any size organization. Security Inspection provides solutions to secure your network. Let us manage the maize of network security so you can focus on what you do best.

SI delivers customized Network Security Solutions that assure the protection of your data and all assets and resources in your network. Our team of highly trained network security and infrastructure engineers provide expert assessments and recommendations regarding intrusion protection, detection, and response. Our customers are in industries such as Manufacturing, Healthcare, Retail, Government, Financial Services, Education, Hospitality and Technology.

Contact us today to learn more about our solutions to secure *your* network.

**Solutions from Security Inspection:**

- Information Security
- Virtualization Services
- Vulnerability Assessments
- Private Cloud Services,
  - Implementation
  - Assessments
  - Managed Cloud Security
- End-Point-Management
- Social Engineering
- Business Continuity & Disaster Recovery
